**Conviction is a ranking score, not a probability or confidence rating.** Score = Composite / 10 x ATD probability x 100. The adapted model uses the existing R3 research simulation baseline; the complete upstream production model has not been recovered.

**Personnel/model inputs:** Oct 14, 7:55 PM ET. Working QB and role cases are conditional; final active checks remain open. DNP/LP are practice levels, not automatic OUT. Roof TBD and assumed workloads remain flagged. Full flags accompany the data.
